I'm a Software Engineer, where I design and build scalable, high-performance backend systems that ensure reliability and efficiency as the foundation of our applications. I have 4+ years of experience and primarily work with Java Spring Boot, Kotlin, Android, SQL, Angular, and TypeScript. Alongside my development role, I am also exploring DevOps and Cloud practices and expanding my expertise in AWS to enhance my infrastructure management skills.

PROFESSIONAL EXPERIENCE

03/2023 – present
Jakarta, Indonesia

Java Backend Developer

Adapundi 🔗

- **API Development** – Developed RESTful APIs with Spring Boot for role management, file handling, and workflow automation.
- **Reporting System** – Created a reporting system for OJK and AFPI submissions, ensuring compliance and data accuracy.
- **Job Automation** – Used XXL-Job to automate recurring tasks and improve execution efficiency.

Tech Stack: **Java Springboot, PostgreSQL, Redis, MyBatis**

03/2022 – 03/2023
Jakarta, Indonesia

Frontend Developer

Insura Media Solusi 🔗

- **Frontend Development** – Built responsive Angular web apps and PWAs for LPS, ensuring cross-device performance.
- **User Experience** – Developed dynamic, user-friendly components aligned with client needs to boost engagement.
- **Scalable Architecture** – Delivered maintainable, high-performance solutions using Angular's modular structure and best practices.
- **UI Enhancement** – Used PrimeNG and Tailwind CSS for a modern, consistent, and flexible UI design.

Tech Stack: **Angular, Typescript, PrimeNG, Tailwind CSS**

10/2020 – 01/2022
Jakarta, Indonesia

Full-Stack Developer

Integra Solusi Mandiri 🔗

- **Web Development** – Built Angular-based web interfaces and PWAs with PHP backend for PT Redkendi Andalan Mitra.
- **Workflow Management** – Used Jira for efficient task and ticket tracking.
- **Agile Delivery** – Delivered quality solutions following agile development practices.

Tech Stack: **Angular, Typescript, PrimeNG, PHP, Jira**

02/2020 – 05/2020
Jakarta, Indonesia

Mobile Engineer

Bangku 🔗

- **Android Development** – Built high-performance native apps using Kotlin with a focus on user experience.
- **Clean Architecture** – Applied MVP pattern and Clean Architecture for scalable and maintainable code.

Tech Stack: **Java, Kotlin, Android**

10/2019 – 02/2020
Jakarta, Indonesia

Software Engineer

whee 

- **Kotlin Expertise** – Built efficient Android apps with Kotlin for robust mobile solutions.
- **Full-Stack Development** – Integrated Kotlin-based Android apps with Java Spring Boot backend systems.
- **Scalable Architecture** – Applied Clean Architecture with MVP for Android and used Spring Boot for backend scalability.

Tech Stack: **Java Springboot, Android, Kotlin**

06/2019 – 07/2019
Jakarta, Indonesia

IT Consultant (Internship)

MII 

- **Issue Resolution** – Resolved project issues for BNI to ensure smooth delivery and minimal downtime.
- **System Analysis** – Analyzed test results, identified bottlenecks, and prepared evaluation reports for better decision-making.

Tech Stack: **Java**

EDUCATION

09/2016 – 09/2019
Laguboti, Indonesia

Diploma Degree, Informatics Engineering

Del Institute of Technology 

- GPA **3.16** out of 4.00
- Thesis **Courses Scheduling Application**

SKILLS

Programming Language

Java, Kotlin, Typescript

Database

MySQL, PostgreSQL, Redis, Firebase

Framework Familiarity

Springboot, Angular, Next.js

Technical Documentation

Swagger, Jira, Notion

LANGUAGES

- Indonesia

- English
